

Calculate Your Network Size

PRIMARY	QUANTITY
Friends	
Family (2 generations)	
Workmates / colleagues	
Business associates	
Other 'associates'	
Total primary network (x)	

If you know 'x' people and they all know 'x' people, what is your:

2nd generation of network:

3rd generation of network:

4th generation of network:

5th generation of network:

6th generation of network:

7th generation of network:

Now assume that some of your friends know each other and there will be a large number of cross networking, so cut 'x' in half and repeat the math's:

2nd generation of network:

3rd generation of network:

4th generation of network:

5th generation of network:

6th generation of network:

7th generation of network:
